EDUCATION

Iowa State UniversityAmes, IA

Bachelor of Engineering in Cybersecurity, Minor in EntrepreneurshipExpected 2027

Relevant Coursework: Network Security, System Administration, Cybersecurity Fundamentals, Database Design, Software Development, Linux Systems

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL, Bash

Cybersecurity: Vulnerability Assessment, Network Security, Phishing Detection, Email Header Analysis, Threat Identification, Risk Analysis, Firewall Configuration, Security Hardening, Incident Response

Systems & Tools: Linux (Ubuntu, CentOS), Git/GitHub, Apache Web Server, Database Design, Systems Design, JavaFX

EXPERIENCE

CHHS IT Student TechnicianAmes, IA

Iowa State UniversityApr 2025 – Present

- Troubleshoot hardware, software, and network issues for the College of Human Sciences and support day-to-day IT operations.
- Configure systems and administer user accounts while following security best practices and access-control procedures.
- Collaborate with the IT team to resolve technical issues efficiently and improve service delivery processes.

Academic TutorSubang, Malaysia

INTI International College Subang2023 – 2024

- Tutored students in Calculus I and II and developed customized learning materials to improve understanding of technical concepts.

TECHNICAL PROJECTS

Phishing Email Detection & AnalysisJun 2025 – Jul 2025

Python, Email Security, Threat Analysis | GitHub

- Developed a phishing-email analysis tool to identify spoofed sender information, malicious links, deceptive language patterns, and forged email metadata.
- Implemented email-header analysis to detect domain mismatches and help validate sender authenticity.

Cyber Security FundamentalsDec 2025

Linux, UFW Firewall, Apache, Network Security

- Conducted a hands-on security assessment of a Linux-based server environment to identify misconfigurations, vulnerabilities, and security risks.
- Applied defensive practices including firewall configuration, access control, secure system administration, and system hardening.

Credit Accounting SystemDec 2025 – Jan 2026

SQL, Database Design, JavaFX, Systems Design | GitHub

- Designed and developed a database-backed application for customer credit sales, balances, partial payments, and transaction history.
- Built a JavaFX interface and structured data workflows focused on accuracy, data integrity, and usability for non-technical users.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google Cybersecurity Professional Certificate | Cybersecurity, Linux/SQL, Risk Management, Detection & Response, Python Automation

Datacom Cybersecurity Job Simulation – ForageFeb 2026

Investigated a simulated cyberattack, documented findings and remediation recommendations, and completed a risk assessment.

LEADERSHIP

President, Hindu YUVA at Iowa State UniversityApr 2025 – Jun 2026

Led a 50+ member organization and coordinated events, budgeting, team planning, and cross-organizational collaboration.

Secretary, Indian Student Association at Iowa State UniversityMar 2025 – Feb 2026

Coordinated communications, records, event logistics, and collaboration for an organization with 200+ active members.
